

Special Session 41

Standardizing Map Data Delivery to Driver Assistance Systems Status and Challenges Ahead

**ITS World Congress
New York
November 2008**

Special Session Speakers

- **Aria Etemad, Ford Research & Advanced Engineering Europe**
- **Robert P. Denaro, Navteq**
- **Vincent Blervaque, Ertico – ITS Europe**
- **Takashi Sugano, Nissan Motor Europe unable to attend**

Session Organizer

- **Michael L. Sena, Hughes Telematics**

Benefits of Standardising ADAS Interface Specification

- **Achieve interoperability**

- Ensure that we do not have a similar problem with ADAS as with the navigation system physical storage formats

- **Prevent diversification of specifications and implementations**

- Ensure that the industry continues to develop along a single path that will be consistent with a single standard

- **Avoid patent from third parties**

- Everyone who has participated in the development of ADASIS should benefit from the work that has been done, and we must ensure that individual companies do not block the quick spread of the technology by claiming intellectual property rights that they do not really own.

ADASIS Forum Standardisation - Progress and Status:

October 2002 – July 2003	Survey the standards committees CEN/TC278 and ISO/TC204 ISO/TC204 Working Group 3 TICS Databases (Transport Information and Control Systems)
August 2003	Invitation to Berlin from WG3 Convenor
October 23, 2003	Presentation to Berlin Meeting
February 2004	Delivered ADASIS documents
July 2004	WG3 Review <ul style="list-style-type: none">• Wait for final documents from Maps&ADAS• IPR ownership• Coordination with ISO/TC22 (Automotive)
December 1, 2004	Status Presentation <ul style="list-style-type: none">• Define a timeline for completion of documents

ADASIS Forum Standardisation - Progress and Status:

Dec. 2004 – Dec. 2005

MAPS&ADAS Project complete documents

February 2006

Decide on timetable for document submission

Feb-June 2006

Depending on timetable, prepare Preliminary Work Item for submission of documents.

Communicate timeline to ISO/TC204 WG3 convenor

Assemble documents for delivery to WG3

Assist WG3 in the preparation of a Preliminary Work Item Proposal (PWI) or New Work Item Proposal (NP)

Submit PWI or NP to ISO/TC204

April – September 2006

Management Board Discussions

September 2006

Final decision of submission to ISO/TC204 WG3

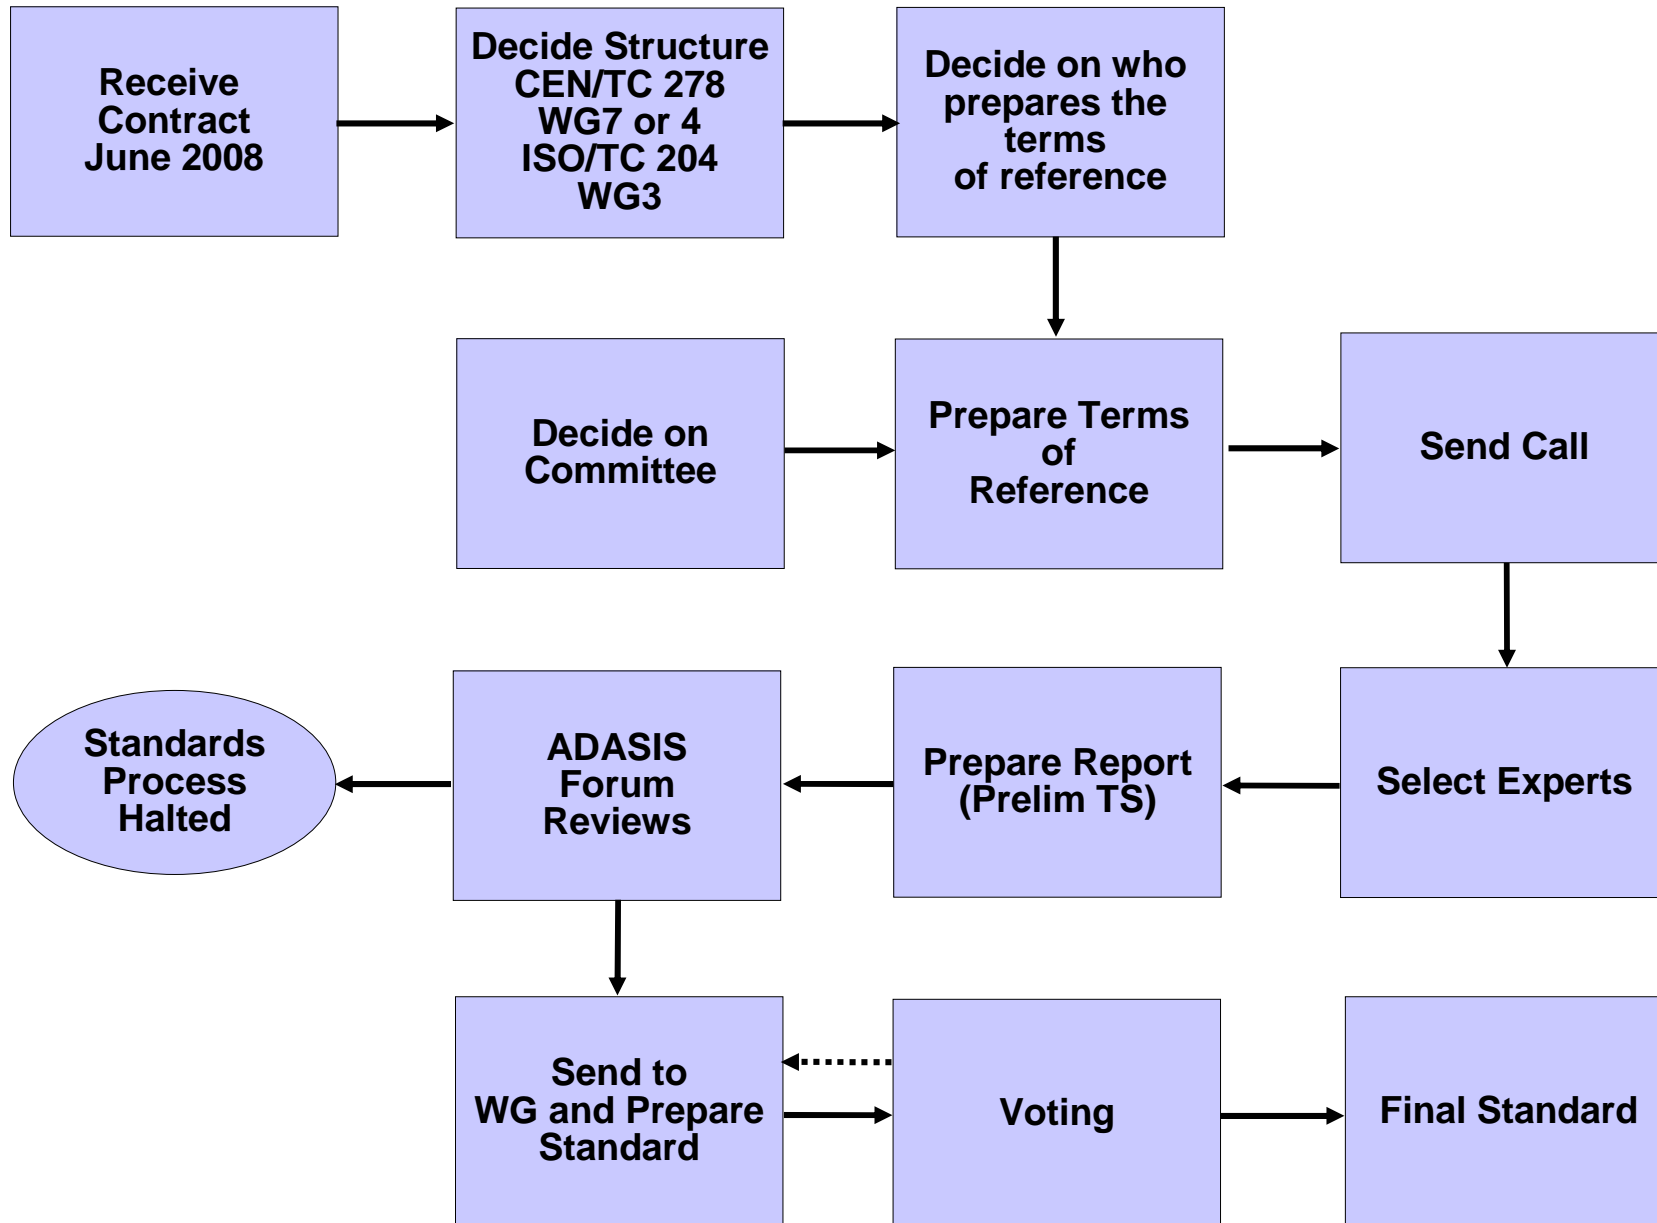

May 2007

Submission of funding proposal to CE N

ICT Standardization Work Programme

May 2008

Statement from CEN that proposal has been approved.

ADASIS Forum Standardisation - Progress and Status:

June 2008

ADASIS General Assembly Meeting - Aachen

CEN process and delegates asked to consider working method

ADASIS V2 Presented

ADASIS Forum Standardisation - Progress and Status:

July - September 2008

Comments collected from ADASIS Forum members

Ford – No to CEN ISO process

Mercedes – No to CEN ISO Process

Navteq – No to CEN ISO Process

- Do not want to yield control
- Protocol not ready for standardisation; too early
- The ADASIS Forum is a better place to develop the standard since all the players are represented

October 2008

ADASIS Forum Management Board Meeting

- Recommendation to keep ADASIS within ADASIS Forum and not proceed to standardisation
- Working Group 4, Standardisation, closed
- Revise working group structure
 - WG1 Specifications (combine WG1 WG2 WG3) A. Bracht, Daimler
 - WG2 New Features (formal WG6) A. Varchmin, Blaupunkt
 - WG3 Interoperability (formal WG5) TBD, OPEL
